### IN CHOOSING *Rainbow*, THE MACHINE OF TOMORROW-TODAY, YOU HAVE CHOSEN THE BEST!

We make this statement because of Rainbow's many unique features and the care with which it is manufactured.

Extensive laboratory research was conducted by highly skilled engineers before the first unit was offered for sale. Precise, controlled manufacturing methods and the finest materials build outstanding quality into each machine. This combination of exhaustive research, modern manufacturing technology and carefully chosen materials makes possible the unique Rainbow — your mechanical maid of many uses — to contribute to the comfort and appearance of your home.

You have seen the Rainbow in operation. Now, as you read this Owner's Manual, the advantages of Rainbow's unique concept of curtailing dust will become even more evident.

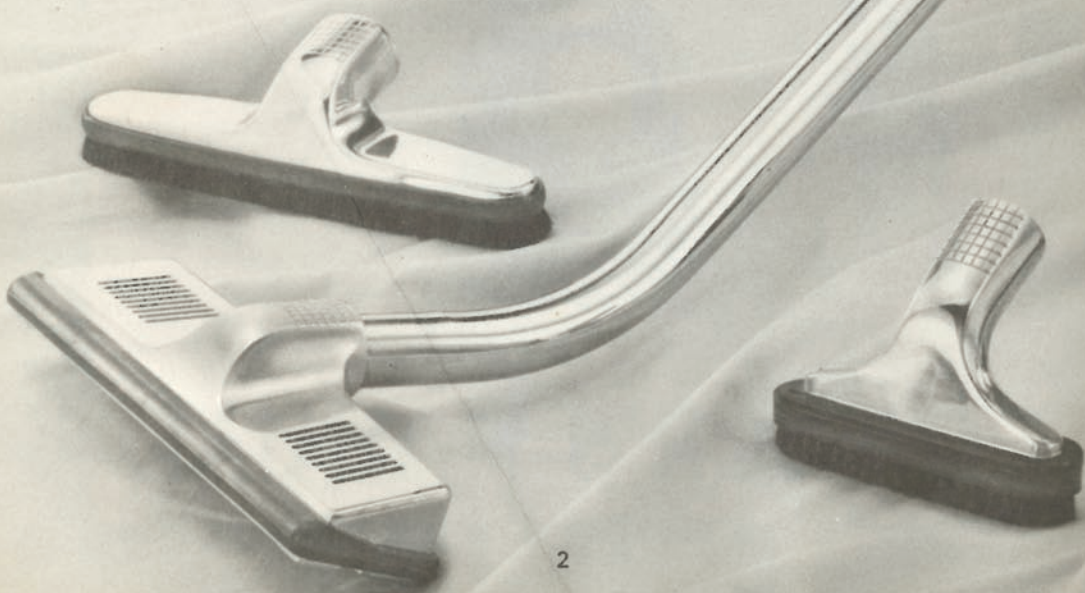

With the Rainbow you will clean, clean. And as you flush away the water-trapped dust and dirt you have the satisfaction of knowing it is out of your home forever.

This manual tells you how to use and care for your Rainbow, illustrates its many uses. Read it carefully!

We thank you for your patronage. Take care of your machine . . . it will reward you with faithful service.

Manufacturers and Distributors of the Rainbow

# THE *Rainbow* CLEANING PRINCIPLE

## HERE'S HOW THE RAINBOW TRIUMPHS OVER DUST

See the floating dust made visible by the sunbeam streaming through the window? It is everywhere in your house, not just where there are sunbeams.

As it settles all over the home this housedust is unsightly, causing homemakers hours and hours of time and effort as they do their best to get the better of it.

It is because of household dust that painted walls need washing or repainting, papered walls require cleaning or re-papering and furnishings must be cleaned and renovated. In addition to this expense, dust hastens the deterioration of furnishings.

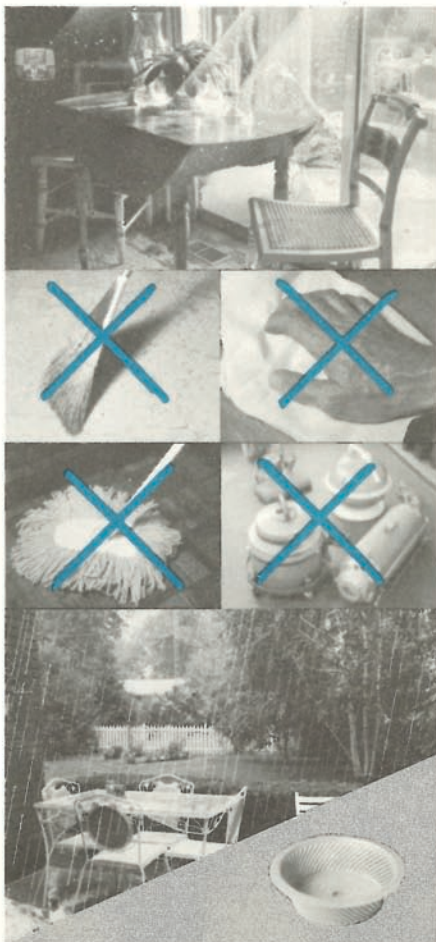

Old fashioned cleaning methods are inefficient because they attempt to handle dust in a dry state. There is more dust in the air after even the most modern cleaning appliance is used than there was before because at least some of the dust picked up is sifted back into the room.

No longer need you use a dust mop, dust cloth, broom or electric sweeper.

Only the Rainbow is truly effective in curtailing this unwanted, unsightly, expense and work-causing housedust.

Nature controls dust outdoors by wetting it with rain, snow, sleet, fog and dew. The secret is "WET DUST CANNOT FLY."

Rainbow found a way to create a rainstorm in your home without getting anything wet, to enable you to trap housedust in water. Rainbow's exclusive, patented Separator, whirling quietly at an amazing speed, makes this possible. The water-trapped dust is then poured away, out of your home forever.

### PLEASE READ VERY CAREFULLY! PROPER CARE FOR LONG LIFE OF THE RAINBOW

**SEPARATOR**—Remove Separator after each use of the Rainbow. Clean it inside and out with soap and water using a Rainbow Separator Brush, dry it and replace it. The Separator Screw should hold the flat rim of the Separator snugly against the flat rim of the wheel beneath it (Spider). The Separator should not be forced against the shaft into which the Separator Screw threads. The Separator Screw need only be "finger tight".

**WATER**—Do not clean too long with one filling of water. Check water during cleaning, and if water is too thick with lint and dirt, empty dirty water and put in clean water. The correct water level is the

top of the post located in the center of the Basin. NEVER FILL BASIN ABOVE POST.

**BASIN**—After each cleaning the Basin should be emptied, washed out thoroughly and dried. Leave the Rainbow OFF Basin until you are ready to use it again. DO NOT PUT THE RAINBOW AWAY WITH EITHER WATER OR DIRT IN BASIN.

Neglecting part or all of the above instructions will cause unnecessary trouble and expense for service. Following these instructions will give you years of trouble-free, efficient service.

(See the directions and pictures on page 5, opposite)

## WATER WASHED CLEAN

Only the unique Rainbow combines the principle of Hydrodynamics (water in motion) and Aerodynamics (air in motion) to assure you a cleaner home and a mechanical maid of many uses.

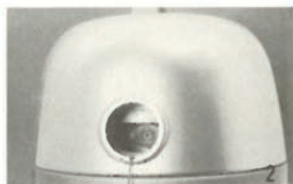

It freshens the air in your home, while you're cleaning, by drowning the dust and dirt in water, washing the air just as you wash clothing.

## THIS IS YOUR *Rainbow* THE APPLIANCE OF MANY USES

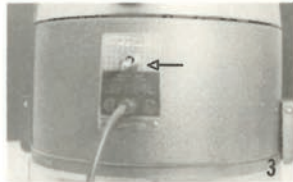

1

1 This is the SUCTION END of the Rainbow. It is used for all cleaning operations. Here dust and dirt are forcefully drawn into the Rainbow where it is trapped in a turbulent water bath.

2

2 This is the BLOWER END of the Rainbow. It is used with Hose attached to operate the Sprayer Attachment, to unplug drains, defrost refrigerators and for other operations requiring a jet of clean air. Without the Hose and with Blower Cap in place, washed air escapes from the peripheral exhaust. The Rainbow is used in this manner to deodorize or aromatize.

3

3 This is the OFF-ON SWITCH. Easily operated by a touch of your toe or fingertips.

4

4 This is the Rainbow SEPARATOR. It makes it possible to trap dust and dirt in the Water Basin. Clean it after every use. (See operating instructions.)

5

5 This is the WATER BASIN. Water level should be even with the top of the post located in center of the Basin. Use cold tap water. Capacity two quarts. Empty, thoroughly wash and dry after every use. (See operating instructions.)

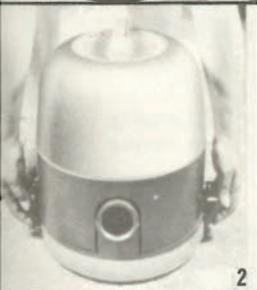

The Rainbow has a rugged, powerful motor generating 1.2 horse power with 900 watts electrical intake. Because it has sealed bearings it requires no oiling, and is approved by Underwriters' Laboratory, Inc. and the Canadian Standards Association. This High Speed Motor whirls at the rate of 13,000 revolutions per minute creating a movement of 45 cubic feet of air per minute. The Rainbow uses a triple, turbine-type fan assembly to create the powerful air flow which so effectively removes deeply embedded dirt.

YOUR *Rainbow* IS A VERSATILE CLEANING DEVICE . . .  
. . . IT IS THE ANSWER TO THE AGE-OLD QUESTION . . .  
"HOW CAN I CURTAIL MY HOUSEDUST PROBLEM?"

# HOW TO OPERATE YOUR *Rainbow*

**1** Fill Water Basin with cold tap water UP TO THE TOP OF THE POST located in the center of the Basin. This is the correct amount of water (2 quarts) for all cleaning operations performed by the Rainbow.

**2** Set power unit on top of Basin so suction end protrudes through power unit side opening. Hook the two clamps to the rim of the Water Basin and snap up. Place on Dolly (wheels).

**3** Insert the long, curved Bottom Wand into the Rug Tool or Floor Brush by matching grooves on Tool with bumps on Wand. Give Tool half a turn.

**4** Connect the Straight Wand and Handle (Short Curved Wand) and insert into the Bottom Wand with Tool on end.

Should the Wands come apart while in use, tap lightly with Curved Wand between slots at the end of the Bottom Wand and/or Straight Wand until a snug fit is obtained.

Should Wands wedge tightly together, hold parallel to the rug or carpet and drop them. The vibration will cause them to loosen. Repeat the process if necessary. If the Wands are properly adjusted for snugness they will not wedge together.

**5** Push soft end of Hose over hump on Handle.

**6** Insert other end of Hose into the suction end of the Rainbow until it clicks. To remove, press spot on coupling marked "PRESS" and pull Hose from machine.

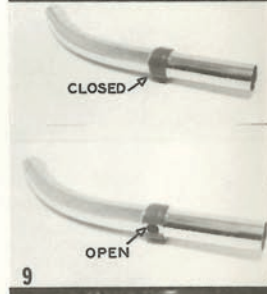

**7** Connect Electrical Cord to outlet. Rainbow's Long Cord enables you to reach any part of the room and hard-to-get-at corners.

**8** Snap switch on Power Unit to "ON" with a flick of your finger or a touch of your toe.

**9** Adjust Suction Control Sleeve on top of Handle. Close opening with Suction Control Sleeve for full power. To reduce suction push Band so opening in Handle is exposed. Correct adjustment is quickly determined while cleaning.

**10** With the machine at your left and behind you, hold the Handle with your right hand at a comfortable angle. Grasp the Hose with your left hand making a loop behind your back. Slowly guide the tool back and forth in smooth and easy strokes. Let the tool and the Rainbow do the work.

## AFTER CLEANING

11

To empty Water Basin release the two clamps. Remove Power Unit. Pick up Water Basin by the curved suction end, pour dirty water from the opposite side, down the drain, and flush away. If the water is flushing as the dirty water is poured in there will be no ring of dirt remaining. The water in the Basin must remain liquid to effectively trap the dust and dirt, therefore **DO NOT CLEAN TOO LONG WITH ONE FILLING OF WATER. WHEN WATER BECOMES THICK WITH LINT AND DIRT EMPTY WATER BASIN AND REFILL.**

12

Wash out Water Basin, rinse and dry thoroughly. Leave Rainbow Power Unit OFF basin until you are ready to clean again. **DO NOT STORE RAINBOW WITH WATER OR DIRT IN THE BASIN.**

13

Remove Separator after each use of the Rainbow. Clean it inside and out with soap and water using a Rainbow Separator Brush, dry it and replace it. The Separator Screw should hold the flat rim of the Separator snugly against the flat rim of the wheel beneath it (Spider). The Separator should **not** be forced against the shaft into which the Separator Screw threads. The Separator Screw need only be "finger tight".

Store Rainbow and attachments in a dry place.

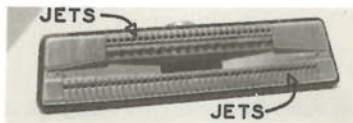

## THE *Rainbow* NYLON BRAIDED HOSE

Rainbow's Nylon Braided Hose is light in weight and truly flexible. And the Handle at the end is easy on your hands, assures you of a firm hold of the hose at all times. To clean: insert hard coupling marked "PRESS" into blower opening after removing Blower Cap. Place the soft end of the Hose into the suction opening. Switch on Motor and jiggle Hose. Any dirt stuck in the Hose will be drowned in the Rainbow's water bath.

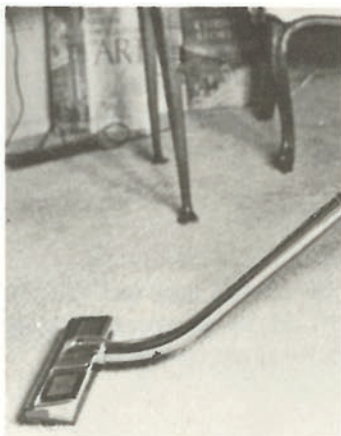

# TO CLEAN CARPETING AND RUGS

## USE JET RUG TOOL

Rainbow's patented Aerodynamic Jet Rug Tool applies the principle of airflow to the cleaning of rugs and carpets. The powerful airflow is created as air is drawn through the louvers at the top of the Rug Tool and is pulled through the rows of jets at the front and back of the Rug Tool Shoe. This forces the air to surge through the nap. At the same time air is drawn through the grooves at the front, back and sides of the Rug Tool Shoe. This turbulent air, too, surges through the nap, picking up the dust, dirt, grit and surface litter.

To operate, simply glide the Jet Rug Tool over carpet or rugs. To pick up surface litter drop the Handle a few inches. On most carpets and rugs use full suction. Suction Control Sleeve will reduce suction if desired. Vinyl bumper protects furniture.

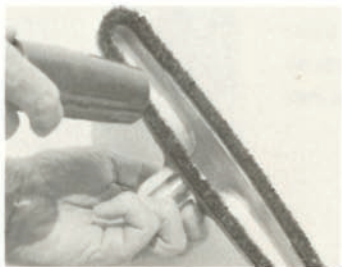

# TO CLEAN UNDER LOW FURNITURE

Twist Handle and lower, as illustrated. Guide Tool beneath your low furniture. No need to move furniture when you use a Rainbow.

# TO CLEAN FLOORS USE COMBINATION FLOOR AND WALL BRUSH

Dust and gritty dirt from cracks and crevices must be removed from floors to prevent scratching and keep them attractively clean. Use full suction as you glide Tool over floor. Tool will pick up surface litter and dirt from cracks and crevices.

To remove dust and lint from Floor and Wall Brush, brush it clean with open end of Hose.

## TO CLEAN WALLS USE COMBINATION FLOOR AND WALL BRUSH

All walls . . . papered, paneled or painted . . . stay cleaner longer when dust and dirt are removed regularly. Attach Handle to Bottom Wand and Tool, as illustrated. Brush is locked into position, it won't fall off. Best results are obtained when only the top edge of the bristles are allowed to touch the wall and cleaning is done with a downward stroke. With a slight space between the wall and the bottom edge of the bristles, dust is whisked away before the bristles touch it, thus avoiding streaks.

## TO CLEAN *Rainbow* FLOOR & WALL BRUSH

Remove Furniture Guard and snap off Brush from Holder. Wash brush in WARM soapy water. Reassemble when dry. Beaded edge of Guard should be up. Clean brushes last longer . . . clean best.

## TO CLEAN UPHOLSTERED FURNITURE

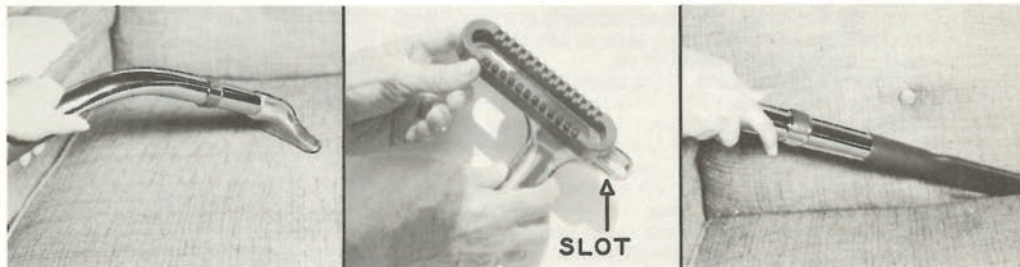

### USE UPHOLSTERY TOOL WITH JET BRUSH AND CREVICE TOOL

Hard-to-get-at places accumulate unsightly dust and dirt. Deeply imbedded dirt cuts fabric life.

Rainbow's Upholstery Tool removes deeply imbedded dirt and with Rainbow's exclusive Jet Brush attached, surface litter, even cat hair, disappears like magic while the Rainbow Crevice Tool gets dust and dirt from behind cushions and other deep recesses.

Attach Upholstery Tool to Curved Wand (Handle). A little twist as you push them together will make them hold securely. Use with full suction. To remove dirt move Tool over areas to be cleaned with slow even strokes. For surface litter attach Jet Upholstery Tool Brush, by sliding Tool into slots on top of brush as far as it will go. Keep Brush clean by whisking with open end of Hose. This Brush may also be washed.

To reach crevices and between cushions slip Crevice Tool on to Curved Wand (Handle). Use full power. Crevice Tool will remove dirt and dust from deep-seated areas, keep your furniture really clean.

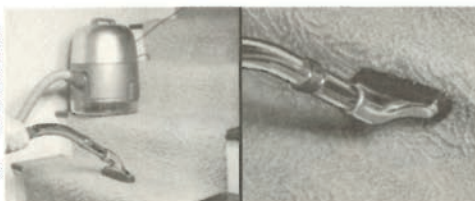

## TO CLEAN STAIR CARPETS

### USE UPHOLSTERY TOOL WITH JET BRUSH

Attach Upholstery Tool with Jet Brush assembled, to Handle. Remember, a little twist as you push them together will make them hold securely. Insert Handle into Hose and attach to machine. Remove Rainbow from Dolly. Allow Rainbow to rest solidly on stair above the one you are cleaning. Move the Rainbow up one step at a time as you continue cleaning.

To clean rug riser turn Tool one-half turn and use as illustrated.

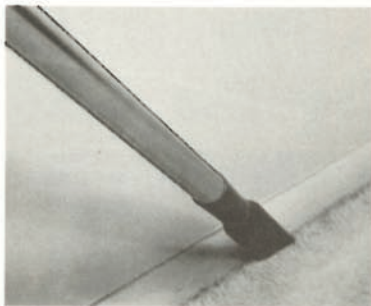

# TO CLEAN IN NARROW PLACES

## USE CREVICE TOOL

To clean in low areas such as between radiator sections, under radiators, along floor edges and baseboards, deep down between automobile cushions, attach Crevice Tool to the Curved Wand (Handle).

Use full suction, with Suction Control Sleeve closed. The unique design of the Rainbow Crevice Tool enables it to suck dirt and grime from the tightest areas.

# TO DUST USE DUSTING BRUSH

Because Rainbow draws dust and dirt in water and releases only washed air back into the home, dusting is always at a minimum. However, to keep your home thoroughly clean don't forget to dust those overlooked places such as, venetian blinds, lamp shades, lighting fixtures, mouldings etc.

Attach the Dusting Brush to the Curved Wand (Handle). Move the Brush lightly over all the surfaces to be cleaned. The soft bristles will not harm your finest furniture, fixtures or fabrics.

On lamp shades and similar fragile objects reduce the suction by opening the Suction Control Sleeve.

To dust over door frames, picture frames etc., attach Dusting Brush to Curved end of Handle (the end usually inserted into Hose) as illustrated and opposite end of Handle into Hose. This extra curve allows you to get behind beveled edges.

Be thorough in your dusting. Don't forget books, pianos, television sets, window frames, heat and cold air vents. Once cleaned by Rainbow it is always easier to keep your home attractively clean.

To clean the Dusting Brush whisk open end of Hose over bristles. To remove greasy lint and dirt, pull brush from plastic back and wash with warm soapy water.

## TO DEODORIZE

Add a few drops of Rainbow Deodorant Air Freshener or your favorite deodorizer to the water in the basin. Place Airator over Suction End of Rainbow, turn on. The 360° peripheral exhaust quickly refreshes the air in the entire area, alleviates objectionable household odors.

## TO AROMATIZE

Put a few drops of any Rainbow Fragrance such as Violet, Apple Blossom, a Rainbow Pine Needle Oil Capsule or any other scent of your choice, in the Rainbow Water Basin. Assemble the Rainbow on the Basin with Airator in place over the intake and turn on switch. In a matter of minutes a pleasant fragrance will permeate your home.

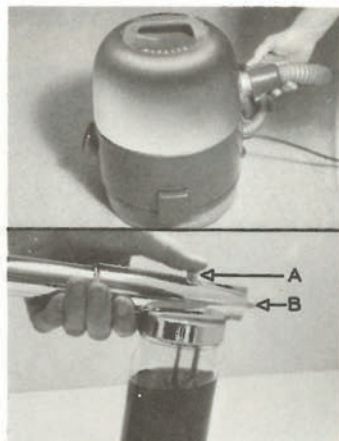

## TO USE THE RAINBOW SPRAYER

Fill glass sprayer jar 3/4 full of solution to be used. Screw on Sprayer Cap and attach to Handle (Short Curved Wand) with a twisting motion so Sprayer is held firmly in place. Close Suction Control Sleeve for full power. Attach Handle to Hose. Remove Blower Cap and attach Hose to Blower End of Rainbow. Use thumb to push Plunger (A) down. If spray is too heavy turn Plunger Button (A) clockwise; if spray is too fine turn Plunger Button (A) counterclockwise until correct volume of spray is produced . . . Sprayer Tip (B) should be tight at all times.

Releasing of Plunger (A) automatically stops spray. It is not necessary to turn Rainbow on and off.

When spraying job is completed, clean jar. Add water or solvent (depending upon material sprayed) and spray through Sprayer. Clean Tip. Do not allow particles to remain in Jar, Sprayer or in Tip.

## TO SPRAY PAINT

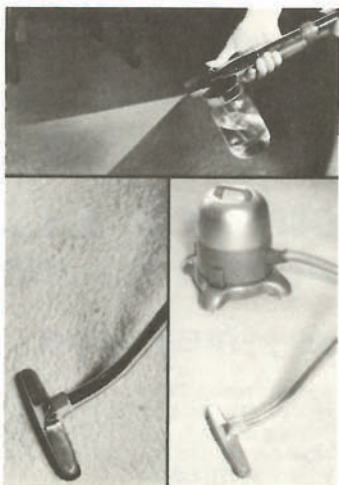

Thin paint to same consistency as recommended for commercial spray guns. Be sure to use thinning agent recommended on paint can label. Follow Sprayer operating instructions. Before painting it is best to practice on a sheet of cardboard. Do not spray too heavy a coat or paint will run. With a little practice you will be able to obtain near professional results. Clean Jar, Sprayer and Sprayer Tip with solvent as instructed above.

## TO SHAMPOO RUGS AND CARPETS

To preserve color and add new life to your rugs and carpeting shampoo them frequently with Rainbow Shampoo Concentrate. BEFORE SHAMPOOING RUGS OR CARPETING BE SURE THE MANUFACTURER DID NOT SPECIFY "DRY CLEAN ONLY." Then clean them thoroughly with the Rainbow before shampooing.

Fill Sprayer Jar with a mixture of Shampoo Concentrate and water as recommended on label. Follow operational instructions as outlined above. Spray a small section of the rug or carpet. DO NOT SATURATE RUG OR CARPET. Use the Floor Brush with all three Wand Sections and, using a scrubbing motion, loosen the discoloring traffic film from the surface. When film and dirt are loosened attach Hose to Suction End of Rainbow and suck up dirt and grime into Rainbow's water bath finishing with a stroke against the nap so the nap stands up.

Start with about a pint of water in the Basin. Empty and rinse the Basin at first sign of suds build-up. Proceed to next section of rug or carpet and repeat process making sure to overlap to avoid "holidays". You will be amazed at the difference in appearance and speed at which you can operate. You can speed the drying process while you change the air under rugs by blowing washed air from the Crevice Tool inserted beneath the edge of the rug. The Hose, of course, is attached to the Exhaust End of the Rainbow.

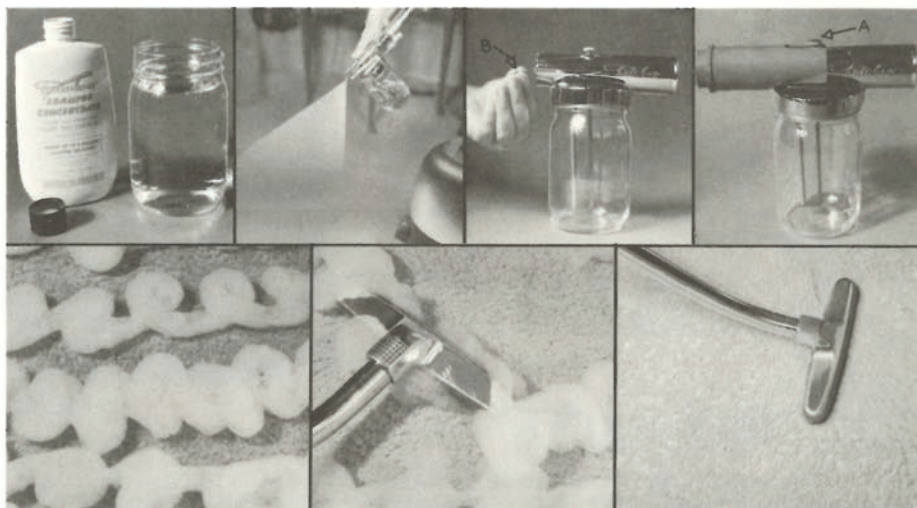

## TO SHAMPOO RUGS AND CARPETS PROFESSIONALLY

A Rainbow Rexafoamer (obtainable at slight additional cost) produces "dry" suds from liquid shampoo. This simple attachment will further improve the quality of your rug or carpet cleaning. **BEFORE SHAMPOOING RUGS OR CARPETS BE SURE THE MANUFACTURER DID NOT SPECIFY "DRY CLEAN ONLY."** Clean them thoroughly with the Rainbow before shampooing.

Fill Jar 3/4 full of Rainbow Shampoo Concentrate and water mixture as directed on bottle label. Attach Sprayer and Hose as previously outlined. Spray a small section of carpet with solution, *lightly*. Turn off Rainbow. Remove Sprayer Tip "B". Attach Rexafoamer as illustrated. Start Rainbow. Press Plunger "A" and distribute bands of suds approximately three inches apart over area that was lightly sprayed with solution.

With Floor Brush attached to three Wand Sections brush "dry" foam over surface of nap with a scrubbing motion until it almost disappears. (Rainbow should not be in operation during this period.) Attach Hose to Suction End of Rainbow and to the Wands with Floor Brush attached. Fill Basin with about a pint of water. **Empty and rinse the Basin at first sign of suds build-up.** Start Rainbow. Brush over area just shampooed finishing with a stroke against the nap so the nap stands up. Loosened dirt and grime will be collected into Rainbow's swirling water bath, rugs and carpets will brighten up "like new". Proceed to next section of rug or carpeting and repeat process, making sure to overlap to avoid "holidays."

## TO SPRAY INSECTICIDES, MOTH PROOFING SOLUTIONS AND OTHER LIQUIDS

Follow directions for using Sprayer Attachment. Adjust Sprayer to volume desired for use and solution. When spraying outdoors use full volume. When spraying indoors, reduce volume if found desirable. When spraying in closets adjust to lowest volume. With the Rainbow Sprayer Pin-Point Adjustment Plunger you will find it easy to spray all liquids with accuracy and uniformity.

## USE YOUR *Rainbow* FOR THESE ADDITIONAL HOUSEHOLD JOBS

### TO REFRESH AIR IN CLOSETS

Add a Rainbow Odorant such as Oil of Pine Needles or one of Rainbow's pleasant Fragrances to the Water Basin. Place Airator over intake. Place Rainbow in closet, turn on, close closet door and let the machine run for about five minutes. Closet stuffiness caused by poor air circulation is quickly corrected this easy way.

## ● TO CLEAN MATTRESSES, PILLOWS, BLANKETS

Use Upholstery Tool without Jet Brush. It is advisable to use full suction power whenever possible to remove deeply imbedded dust and dirt. For lightweight blankets open the Suction Control Sleeve for reduced suction.

## ● TO CLEAN DRAPES AND CURTAINS

Use Upholstery Tool with or without Jet Brush. On delicate fabrics use reduced suction. If more wand length is needed use handle and Straight Wand Section. Be sure to dust the top of fabric and wooden valances. It's easy to do with the Upholstery Tool with Jet Brush attached.

## ● TO CLEAN FUR COATS AND CLOTHING

Use either the Upholstery Tool or Dusting Brush for surface cleaning. Use the Crevice Tool for pockets, cuffs and creases. Regular Rainbow cleaning is excellent protection against moths and will help restore articles to their original appearance.

## ● TO CLEAN AUTOMOBILE INTERIORS

Use Upholstery Tool, with or without Jet Brush, for seats, back cushions and floors. Use Crevice Tool for corners, behind cushions, in upholstery grooves. Use Dusting Brush for dashboard, instrument panel, steering post, around windows, etc.

## ● TO GROOM PETS

Use either the Upholstery Tool with Jet Brush or Dusting Brush to groom dogs and cats. Dust, dirt and loose hair are easily removed by the Rainbow's silent powerful suction. Pets enjoy it too. Frequent grooming cuts down need for baths.

## ● TO CLEAN SCREENS

Use either the Upholstery Tool with Jet Brush or Dusting Brush attached to Handle with full suction. Now it's easy to do screens indoors. Rainbow's water bath drowns dust and dirt and exhausts only washed air into the room. Rainbow's powerful suction removes those fine particles of dust and dirt that refuse to come off when using old fashioned cleaning methods such as the garden hose.

## ● TO CLEAN HATS

Use the Dusting Brush to clean all types of hats, felt, fur or flowered. Reduce suction if necessary on delicate women's hats with high ornamentation. Use full suction for men's hats. Dust and dirt will disappear as if by magic.

## ● TO DUST BOOKS, MAGAZINES, RECORDS, TAPES

Use the Dusting Brush. Will not harm those records or tapes. Makes it easy to keep book shelves and book cases clean. Use the Rainbow, too, to dust inside your HiFi set or Record Player.

## ● TO CLEAN FOLIAGE OF REAL AND ARTIFICIAL HOUSE PLANTS

Use the Dusting Brush. Reduce suction and gently brush over leaves. Dust which hides natural leaf sheen is quickly removed.

## ● TO DEFROST REFRIGERATORS AND FREEZERS

Clean out Hose by inserting it into the Blower Outlet and placing the Handle end of Hose into intake, turn on Rainbow and shake Hose to remove dust and dirt. Take Hose from intake, attach Curved Wand (Handle) to Hose and direct warm air to frost covered areas. Frost melts quickly. To remove liquid, attach Hose to Suction End and suck up water into Rainbow Water Basin. Water in Basin must never exceed two quarts. If you are to defrost a large area reduce amount of water in Rainbow Water Basin before starting, or eliminate the water entirely. Water should never come above level of top of post in Basin. If in doubt, check water level once or twice during water pick up operation.

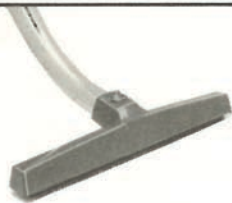

## ● TO UNPLUG CLOGGED DRAINS AND TRAPS

Attach Hose to Blower End of Rainbow. Hold end of Hose to drain, covering any drain opening left exposed with a damp cloth. If there is an overflow drain, plug it with another damp cloth. Flick on the Rainbow Switch. The air force often pushes whatever is clogging the drain through the pipe or trap. If this does not work connect Hose to Suction End of Rainbow. This may pull the clogging material out of the drain or trap. Repeat until drain is clear. During operation liquid in Water Basin must never exceed two quarts.

# RAINBOW SUPPLIES & EQUIPMENT SPECIALLY

## Rainbow FLOOR SQUEEGEE

You can scrub your floors in your "Sunday Best" without getting your hands wet, using the new Rainbow Floor Squeegee. Almost effortlessly your floors come clean . . . ready for waxing. Scrubbing linoleum, tile and wood floors is a breeze with the new Rainbow Floor Squeegee . . . . . \$6.95

## Rainbow SEPARATOR BRUSH

Its sturdy nylon bristles and curved handle make it "just right" for convenient cleaning of the Rainbow Separator . . . . . \$3.00

## Rainbow POWER BRUSH

Add BRUSH-UP ACTION to the normal suction power of the Rainbow. The Power Brush has a spring lock swivel that slips onto the extension Wand in seconds. It's sturdy, lightweight, easy to use. FULLY AUTOMATIC, it works on the normal suction action of the Rainbow. No extra motor, no separate wires. Brush revolves 4,500 times a minute . . . gently sweeping up lint, threads, pet hair and dirt. . . . . \$19.95

## Rainbow 16" FLOOR BRUSH

Those "big cleaning jobs" are easily and effectively handled with Rainbow's 16" Floor Brush. Wide expanses of bare floor are swept free of dust and dirt with a minimum of effort. It is recommended that when using the 16" Floor Brush the four-quart basin be used because of its greater capacity . . . . . \$13.95

## Rainbow 4-QUART BASIN

The Rainbow 4-Quart Basin is available for those "bigger" cleaning jobs. It's ideal for larger homes, office buildings, hotels, schools, hospitals, etc. The larger Water Basin doubles cleaning capacity. Your Rainbow so equipped and used with the Dolly, makes an ideal combination for handling those "over-sized" cleaning jobs. \$10.95

## Rainbow POLICHAMP

## POLISHES WOOD, TILE OR LINOLEUM FLOORS

The Rainbow Polichamp, with the Rainbow Power Unit clamped in place is an efficient floor polisher. It has been called the next best thing to a maid. The 12" diameter round brush coupled to the rugged power of the Rainbow, gives floors the brightshine of regular care . . . . . \$49.95

Scrubbing Brush for the Polichamp available. It makes short work of removing dirt, grime, even scuff marks, with a minimum of effort. Leaves floors ready for waxing and polishing. . . . . \$5.50

Shampoo Brush for the Polichamp available. It makes for an even more professional rug or carpet shampooing job while greatly minimizing the effort required. . . . . \$5.50

## Rainbow FLOOR CLEANER CONCENTRATE

Rainbow Floor Cleaner Concentrate is ideal for thoroughly cleaning bare floors, whether they are wood, linoleum or tile of any kind. No back-breaking scrubbing; just spread on Floor Cleaner Concentrate in recommended solution and let it do the work. .Quart. \$1.90

## Rainbow FLOOR FINISH

Rainbow Floor Finish is easy to apply. It's clear, non-yellowing; has high luster but is buffable to even higher gloss; non slip; scuff and water resistant; easily removed; covers present wax or finish if clean; worn, high traffic areas can be recoated without lap marks; beautifies and protects all types of flooring. . Quart. \$1.30

# DEVELOPED FOR USE WITH THE RAINBOW

## Rainbow REXAFOAMER

The Rainbow Rexafoamer makes "dry" suds from liquid shampoos. You can shampoo rugs and carpets inexpensively, yet professionally, right in your home. All the inconvenience and bother is eliminated and the cost is surprisingly little . . . . . \$4.95

## Rainbow HAIR DRYER

**IT WASHES  
THE AIR THAT  
DRIES YOUR HAIR**

You will have softer, lovelier, easier-to-manage hair when drying hair with this excitingly new Rainbow Hair Dryer. Warm, water-washed air will have your hair dry before you know it . . . so easy to use, too! Rainbow's Hair Dryer permits free movement, enabling you to relax, sew or tend to other household duties while your hair is dried with water-washed air! Simply wash your hair, set and follow the easy instructions. See how quickly and beautifully your hair dries . . . . \$7.00

## Rainbow SPIN CLEAN

### VENETIAN BLIND CLEANER

The new power-driven Spin-Clean cleans Venetian blinds easily, quickly, thoroughly and without fuss or muss. It eliminates sponges, buckets and soaps; saves time, energy and money; cleans top and bottom of a slat in one stroke. The Spin-Clean has self-cleaning, rotating brushes. \$5.50

## Rainbow HASOCK

Covered with finest durable plastic-gold, tan or white - easily cleaned. Upholstered with Cellulose fibre and cotton. Gold Myler welt, such as used in most expensive furniture. Patented Stay Hinges to match cover of welt. Wood frame. Comes ready to use . . . . . \$18.95

## MASSAG-AIR

For massaging the scalp, loosening and mechanically removing dandruff. When used in conjunction with the Rainbow's suction, dandruff is mechanically removed . . . . . \$1.50

### Rainbow FURNITURE POLISH

Rainbow Furniture Polish, in handy aerosol can, gives furniture and woodwork a long-lasting, lustrous finish. A light spray on the surface of the furniture and a quick once-over with a soft cloth is all that's needed . . 12 ounces . . \$1.30

### Rainbow SHAMPOO CONCENTRATE

Rainbow Shampoo Concentrate quickly removes unsightly traffic film from rugs and carpets. Safe for all washable materials; non-inflammable. No hard scrubbing needed; cleanses thoroughly; dries quickly . . 8 oz. . \$1.30

### Rainbow DEODORANT- AIR FRESHENER

A small quantity of Rainbow Deodorant-Air Freshener added to the water in the Rainbow Water Basin alleviates objectionable household odors like fish, tobacco, cabbage, paint etc. Quart . . . . . \$1.95

### Rainbow PINE NEEDLE OIL

Rainbow Pine Needle Oil, adds a delightful Pine Needle freshness to your home. Simply break one capsule into the water in your Rainbow Water Basin and bring the fragrance of pine indoors. Box 100 Capsules . . . . . \$2.45

### Rainbow FRAGRANCE PAC

With the Rainbow Fragrance Pac you can make your home as sweet and refreshing as a spring garden. The four Rainbow Fragrances, Apple Blossom, Violet, Oil of Pine Needles and Gardenia, come packed in a handsome, reuseable plastic box. \$2.50

SUGGESTED RETAIL PRICES may vary due to shipping costs. Subject to change as required.

**REXAIR INCORPORATED**

**DETROIT, MICHIGAN 48231**

## **A WORD ABOUT SERVICE!**

Rainbow and Rexair Authorized Service Distributorships are located in principal cities of the United States, Canada and Mexico. There is one near you.

To find it, look in your telephone directory. If you live in a rural area or small community consult the directory of the nearest large city, or write Rexair Incorporated, P. O. Box 287, Detroit, Michigan 48231.

Deal only with Authorized Distributors. Your Rainbow will then be serviced by expert mechanics using specially designed tools and only Rexair factory made parts and you will be protected against unfair charges and inexperienced handling.

## **MANUFACTURER'S GUARANTY**

We guarantee each new Rainbow Cleaner to be free from defects in materials and workmanship and agree to replace all parts thereof that shall under normal use and service fail, for any cause, within one year from date of sale, provided examination discloses to our satisfaction that the parts were defective, and provided that said machine shall be returned to an authorized Rainbow or Rexair Sales and Service Office or Service Station, transportation pre-paid. Such replacement shall not include labor.

This guaranty is expressly in lieu of all other guaranties expressed or implied and of all other obligations on our part and no person or company is authorized or permitted to make any guaranty or assume for this company any liability not strictly in accord with the foregoing.

OUR OBLIGATION UNDER THIS GUARANTY IS TO THE ORIGINAL PURCHASER, ONLY, AND IS LIMITED TO REPLACEMENT OF PARTS PROVED DEFECTIVE IN NORMAL OPERATION AND IS NOT VALID WHEN UNAUTHORIZED REPAIRS HAVE BEEN MADE OR ATTEMPTED.

**"RETAIN YOUR PURCHASE CONTRACT OR YOUR CANCELLED CHECK AS PROOF OF DATE OF PURCHASE, SHOULD YOUR RAINBOW REQUIRE SERVICE UNDER THIS GUARANTY."**

**REXAIR INCORPORATED**
